In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.

### **Mathematical optimization - Wikipedia**

The paper reviews the application of deterministic-stochastic models in some areas of computational electromagnetics. Namely, in certain problems there is an uncertainty in the input data set as some properties of a system are partly or entirely unknown. Thus, a simple stochastic collocation (SC) method is used to determine relevant statistics ...

Finite-difference time-domain or Yee's method (named after the Chinese American applied mathematician Kane S. Yee, born 1934) is a numerical analysis technique used for modeling computational electrodynamics (finding approximate solutions to the associated system of differential equations).

### **Finite-difference time-domain method - Wikipedia**

So the layman will need to understand that there is a new kind of electromagnetic energy that is altogether different from what he knows, e.g. radio, TV, cell phones, etc.

American Journal of Nanosciences (AJN) is published quarterly, it accepts papers in the field of nanosciences, defining nanophysics as the study of physical and chemical phenomena using physical and chemical methods and concepts. The journal presents original papers, reviews and letters. The primary goal of this journal is to advance the ...
