

the evolution of claire pdf

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction.

Evolution - Wikipedia

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates – in particular genus *Homo* – and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, the great apes.
